SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

- 25X1 1. The Turnovo Prison operates a stone quarry at Samovodene which is approximately seven kilometers from Turnovo on the Stara Zagora-Ruse railroad line in the direction of Gorna Orehovitsa.
- 25X1 2. The total number of prisoners working in the quarry are about two hundred and they are all prisoners sentenced by the Peoples Courts. They come from all prisons in Bulgaria.
3. The quarry is guarded by Militiamen only, who maintain four posts on the outside of the barbed wire fence surrounding the quarry.
4. The entrance to the quarry compound is located about fifty meters from the Samovodene Railroad Station.
5. The quarry is composed of the quarry proper, main building, store house, conveyor line, crushing plant and railroad spur. The crushed stone from the quarry is used in maintaining: the Gorna Orehovitsa yards and tracks with gravel, and the lines (roadbeds) emanating from Gorna Orehovitsa within the Gorna Orehovitsa Division of the railroad.
6. The weak spot of the quarry compound is located on the east side above the quarry proper where a hill ridge runs down into the quarry. The entire slope is covered with thick bushes which run right to the wire fence itself.
7. The whole panorama of the quarry can be seen from the windows of all local trains which stop at the Samovodene Station.
8. The village of Samovodene is opposite the quarry, on the other side of the Yantra River. The Turnovo road is also on the other side of the river. The only path from the quarry, on the same side of the river, is the path to Sveta Troitsa Monastery.
